Edit List of View and add Condition

In Item Discontinued & Place Order with Supplier add the following condition

Create/Edit Static List of Values Entry

Condition Type

Function Body Returning a Boolean

Expression item / column=value item / column not null item / column null request=e1 exists never none

?

Language

PL/SQL

?

Expression 1

```
BEGIN
IF :P2_STOCK = 'Out of Stock' THEN
    RETURN TRUE;
ELSE
    RETURN FALSE;
END IF;
END;
```

?

☐ Do not validate code (parse code at runtime only).

Apply Changes

In Page Designers add to Two Page Items , Type Select List and add list of values from shared components accordingly.

In P2_ITEM add parent item and item to submit

The screenshot shows a configuration panel titled "Cascading List of Values" with a dropdown arrow on the left. It contains three settings:

- Parent Item(s):** A text field containing "P2_STOCK" with a menu icon (three horizontal lines) to its right.
- Items to Submit:** A text field containing "P2_STOCK" with a menu icon (three horizontal lines) to its right.
- Parent Required:** A toggle switch that is currently turned on (green).

Thanks
